## **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With regards to claim 1, applicant discloses a microstrip line in line 13. Is applicant referring to the additional microstrip line or the resonators composed of microstrip line?

In line 13, applicant states each capacitively coupled to one of the resonator microstrip lines. With regards to the limitation "each capacitively coupled", is applicant referring to the first and second end?

With regards to claim 2, applicant disclose in claim 1 that the plurality of resonators comprises a microstrip line. Accordingly, this limitation has been incorporated by reference through out the claims dependent from claim 1. Therefore, the resonators of claim 2 cannot be constructed using the alternatives a stripline, coaxial line dielectric resonator or waveguide configurations in view of the microstrip lines resonators incorporated by reference into clam 2.

Claim 3 recites the limitation "the means for coupling non adjacent one of the resonator" in line. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2817

Also with regards to claim 3, applicant discloses "an additional tunable capacitor and conductor". Are these the same as "the additional microstrip line and additional tunable capacitor" recited in claim 1?

Claim 6 recites the limitation "the tunable dielectric film" in line 2. There is insufficient antecedent basis for this limitation in the claim.

## **Affidavit**

The affidavit under 37 CFR 1.132 filed July 19, 2005 is not persuasive. The statement is merely an unsupported assertion. The arguments regarding the asymmetric response are not commensurate with what is claimed. The sworn statement is drawn to three patents (US Patent No. 6,686,817, US Patent 6597,265 and US Patent No. 5,543,764). Claims 1-4, 12 and 14 are now rejected under 35 USC 102(b) rejection based on reference Giraudeau et al. With regards to claims 6, 7, 17 and 18, the claims are rejected under 35 USC 103 rejection based on Giraudeau et al in view of Zhu et al. Giraudeau et al disclose a filter comprising a plurality of resonators each connected variable capacitor. Zhu et al disclose a tunable filter using a dielectric varactor. One of ordinary skill in the art would have found it obvious to replace the general variable capacitors of Giraudeau et al with the dielectric varactors as taught by Zhu et al. The dielectric varactor provide a lower loss, higher power handling and faster tuning speeds.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly E. Glenn whose telephone number is (571)-272-1761. The examiner can normally be reached on Monday-Friday 7:30 to 4:00.

Application/Control Number: 10/051,144 Page 4

Art Unit: 2817

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571)-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
